

WASTE

Mountains of trash: India's waste problem

Trash. It's a huge problem all over the world - especially in growing cities. From waste-pickers in Mumbai to board games in Bangalore, Sella Oneko explores how India, population 1.25 billion, deals with garbage.

Living Planet: Defending Mother Earth

10.08.2017

To mark International Day of the World's Indigenous Peoples, we find out how indigenous groups are fighting to preserve their native lands and resources. 

Living Planet: Apps not arms

10.08.2017

Despite conservation efforts, swathes of Brazil's Amazon forest are still lost to deforestation. Small-scale illegal logging can be difficult to monitor, even with satellite-imaging technology. Now, one indigenous tribe is looking to GPS mapping on smartphones to protect their forest. 

Europe's taste of a hotter planet

10.08.2017

With 2017 set to be among the hottest years on record, Europe's extreme-weather summer may be a taste of the new normal.
